ROHIT KUMAR

Data Analyst | SQL · Python · Tableau · Snowflake · ETL
Delhi, India | rohit.kumar.ug23@nsut.ac.in | +91-9999993119
GitHub | LinkedIn | CareerHQ (Live) | LeetCode: 300+ DSA | NeetCode: 150+ SQL

PROFESSIONAL SUMMARY

Computer Science undergraduate (NSUT, 2027) with hands-on data experience across three internships: SQL and Snowflake data modeling, ETL pipelines, Tableau/Matplotlib dashboards, and stakeholder reporting. Solved 150+ SQL problems on NeetCode and 300+ DSA problems on LeetCode. Familiar with statistical analysis (paired t-test, Cohen's d), Python (Pandas, NumPy) and data visualization, turning raw data into business insights. Also builds full-stack products end-to-end, so comfortable working with engineers and cross-functional stakeholders.

EXPERIENCE

Software Engineering Intern, AI/LLM Initiative | Paytm (One97 Communications) Jun 2026 - Present | Remote

- Built React.js + TypeScript dashboards for real-time financial data visualization, cutting reporting turnaround by 30% for Portfolio Managers.
- Built RAG and multi-agent workflows (LangGraph, ChromaDB) behind FastAPI REST APIs for real-time data workflows, reducing manual overhead by ~40%.
- Contributed to Docker/Kubernetes-based microservices and GitHub Actions CI/CD, reducing code review cycles by 25%.

Software Engineer Intern | Bluestock (Fintech Startup) Jun 2025 - Aug 2025 | Remote

- Engineered **Snowflake** ETL pipelines and data models processing 4 TB of financial data weekly, reducing query times by 40% via warehouse optimization.
- Shipped 8+ production features for a financial analytics platform (React.js, Node.js) in 2-week Agile sprints; reduced latency by 35% via Python/TypeScript optimizations.
- Integrated AWS Lambda for real-time data ingestion; automated ETL monitoring and scheduling with Shell scripts, reducing manual interventions by 70%.

Machine Learning Intern | Sigma TechAI Feb 2025 - Apr 2025 | Remote

- Built **Tableau** and Matplotlib dashboards for BI reporting and delivered weekly performance reports to senior stakeholders, translating model results into business insights.
- Designed ML pipelines (classification/forecasting) on AWS S3, Glue and Kafka, achieving 85% predictive accuracy (12% above baseline); automated ETL with data validation and feature-drift monitoring.
- Integrated Apache Kafka for real-time streaming, reducing data processing lag by 30%.

PROJECTS

MindSaathi: Research Analytics | Python, SQLite, Matplotlib, Streamlit GitHub

- Built the data layer for a research project: anonymous SQLite logging of pre/post PSS-4 stress scores and survey ratings, with SPSS/JASP-ready CSV export.
- Wrote Python scripts for paired t-test, Cohen's d and classifier metrics (accuracy, precision, recall, F1), and generated 300 DPI publication-ready charts.

SmartDialer | Python, FastAPI, SQLite, WebSocket, React GitHub

- Built a predictive call-pacing engine using EWMA-based answer-rate forecasting and a real-time React dashboard streaming live call metrics over WebSocket.

Search.ai | Next.js, Supabase, Gemini/Groq, PostHog, Razorpay, Stripe GitHub

- Built a decision-intelligence platform with multi-engine AI routing and fallback; added Supabase auth, dual payment gateways and privacy-first product analytics (PostHog).

CareerHQ | React, TypeScript, Vite, Gemini API, Stripe, Netlify GitHub | Live

- Solo-built an AI career platform (ATS Resume Analyzer, Cover Letter Generator, LaTeX Resume Builder) with a Stripe subscription flow and transactional emails.

TECHNICAL SKILLS

Data & Analytics: SQL (150+ NeetCode problems), Data Modeling, ETL / Data Pipelines, Data Visualization, Business Intelligence, Statistical Analysis (paired t-test, Cohen's d), Web Analytics (PostHog)
Tools: Tableau, Matplotlib, Snowflake, PostgreSQL, SQLite, SPSS/JASP exports, Git, GitHub Actions
Python: Pandas, NumPy, Matplotlib, FastAPI
Cloud & Pipelines: AWS (S3, Glue, Lambda), Azure, Kafka, Databricks, Docker
Other: React, TypeScript, REST APIs, Prompt Engineering, RAG, LangGraph (for AI-assisted workflows)
Soft Skills: Effective Communication, Stakeholder Reporting, Cross-functional Collaboration, Ownership

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science & Engineering | NSUT, Delhi 2023 - 2027

Coursework: DSA, DBMS, OS, Computer Networks, OOPs, System Design | Certification: Microsoft Azure Fundamentals (AZ-900) | NCC Cadet (2019 - 2024)
